Stay optimistic

Steady flow glass demand-supply outlook; more in Malaysia

XYG's 2016 core profit was a 2% miss on topline and tax. Meanwhile, we see nice float glass GPM expansion in 2H16 amid price hike, which we expect to stay strong amid balanced demand/supply with higher cost. New expansion in Malaysia is also a support to margin given lower fuel costs there. We retain BUY on XYG given undemanding valuation of 7.4x 17CL PE/6.6% 17CL dividend yield, with stable float glass demand/ supply dynamics (eg, less worry on property, supply limitation amid pollution controls) and any cost reductions as key catalysts.

2016 core profit 2% miss on revenue

2016 core profit (HK\$3,055m, +76.2% YoY) is a 2.0% miss to CL. This is mainly due to a 3.7% miss in revenue (+12.1% YoY) for all segments (auto, construction, and float glasses) and higher-than-expected tax, offset by lower-than-expected OPEX. Meanwhile, GPM was in line, with float glass GPM expanding 16.4ppt YoY (to 27.5%) amid lower cost and ASP hike in 2H16.

Stable float demand/supply in 17CL

We reiterate our view of a relatively balanced float glass demand/supply in 17CL, instead of a deteriorating market: for demand, property restrictions are more focused in specific regions; and for supply, further restart/brand new capacity are limited from here, with stricter pollution controls and higher industry self-discipline to help. Float glass prices also stayed high even under slack season since 4Q16, with higher costs/better-than-expected demand providing support, and new Malaysia plant will support margin as well. We forecast float glass GPM of 30.9% in 17CL, vs 22.3%/31.2% in 1H16/2H16.

Further expansions

Total Capex budget for 2017 is HK\$2.5bn (2016: HK\$1.85bn), mainly for Malaysia's expansion and investment property at Qianhai. In particular, with the expected good profitability in Malaysia, XYG will invest the second phase with two float glass lines. XYG will further improve efficiency of auto glass and construction glass facilities despite no/limited capacity growth, which will help support steady sales performance despite impact from Rmb depreciation.

Reiterate BUY

We lift our 17/18CL core profit forecasts by 3.6%/4.5% mainly on higher float glass GPM and capacity, partly offset by lower contributions from XYS. Our TP is unchanged at HK\$8.35, which is based on blended PE/PB approach.

XYG FY16 core profit missed by 2%, due to 3.7% miss in revenue and higher-than-expected tax

All segment logged

slightly lower than expected revenue

2016 core profit 2% miss on revenue

XYG reported 2016 results with reported net profit (HK\$3,213m, +52.1% YoY) 2% above Bloomberg, but core profit (HK\$3,055m, +76.2% YoY) a 2.0% miss to CL. This is mainly due to a 3.7% miss in revenue (+12.1% YoY) for all segments (auto, construction, and float glasses) and higher-than-expected tax, offset by lower-than-expected OPEX. Meanwhile, GPM was in line, with float glass GPM expanded 16.4ppt YoY (to 36.3%) amid lower cost and ASP hike in 2H16.

Key highlights:

- Reported revenue was HK\$12,848m, up 12.1% YoY and 3.7% below our forecast. All segments logged slightly lower than expected revenue, including auto glass sales (-1.0% YoY, 5.8% miss), construction glass sales (-2.3% YoY, 3.7% miss) and float glass sales (+29.6% YoY, 2.0% miss), which is likely partly related to Rmb depreciation.
- Reported GPM was in-line, at 36.3%, +8.9ppt YoY. In particular, GPM for float glass was 27.5%, +16.4ppt YoY and 0.8ppt above us, thanks to NG price cut announced in Nov-16 to lower fuel cost, as well as significant ASP hike in 2H16. GPM for auto glass and construction glass also expanded on lower cost.
 - OPEX was HK\$1,793m (+13.2% YoY), 2.8% below our forecasts, suggesting slightly better than expected efficiency despite the preoperating expenses for the new Malaysia plant. Depreciation expense was HK\$797m (+4.4% YoY), also below our forecast by 6.9%.
 - ➢ Share of associate profit was HK\$563m, up 77.3% YoY and 2.4% above us, due to significant increase in profit contribution from XYS.
 - Meanwhile, tax expense was HK\$607m (+128.3% YoY), 14.1% above us given certain subsidiaries yet to enjoy preferential tax rates from being recognised as high-tech enterprises which are under applications.
 - Reported net profit was up 52.1% YoY to HK\$3,213 m, in line with the previous profit alert (HK\$2,958-3,275m), and 2.4% above Bloomberg (HK\$3,139m). After adjusting for FX and fair value gains and last year's non-core items (FX, subsidiary disposal, deemed gain from XYS's placement), core profit was calculated to be HK\$3,055m, up 76.2% YoY and 2.0% below our forecast.
 - > The company declared a final dividend of 23.0 cents per share, implying full-year payout ratio of 48%.

cost

GPM was helped by lower

Tax expense is higher than expected

Core profit is 2.0% below our forecast; reported profit is in line with previous profit alert

Reiterate our view of a relatively balanced float glass demand/supply in 17CL

Raising float glass GPM forecasts given prices stayed high **Stable float demand/supply in 17CL** We reiterate our view of a relatively balanced float glass demand/supply in 17CL, instead of a deteriorating market. For demand, property restrictions are more focused in specific regions, instead of nationwide tightening. Our property team holds the view that there is low risk of the tightening measures becoming too aggressive as there are no pressing affordability issues, as price increases have happened mostly in cities of high wealth/income/population growth where affordability should catch up. For supply, our previous channel checks suggested further restart/brand new capacity are limited from here, particularly that environmental standards are becoming stricter and stricter.

Besides, we also noted float glass prices stayed high in 4Q16 and early 2017 despite the traditional slack season. Increased costs are supporting factors to prices, and we also believe market demand is also fairly decent to help. In addition to the increase in natural gas price during winter, soda ash prices surged significantly since 4Q16, which would result in higher cost in 17CL despite we do not see these as long lasting. Imported, lower-priced soda ash as well as new plant in Malaysia (with lower NG cost) will support margin as well. We forecast float glass GPM of 30.9% in 17CL (from 27.9% previously), vs 22.3%/31.2% in 1H16/2H16.

Float glass prices stayed high even under slack season

More supply discipline

The China Architectural and Industrial Glass Association proposed last year to setup a fund to subsidise elimination of excess capacity in the float glass industry. They are proposing a surcharge of c.Rmb0.052/kWh for each unit of electricity used for all glass capacity in China for 5 consecutive years, or Rmb0.26/kWh for 1 year. The fund collected will be used for compensation for shutting down glass capacity on the basis of Rmb10/weight case. The proposal would be submitted for government studying.

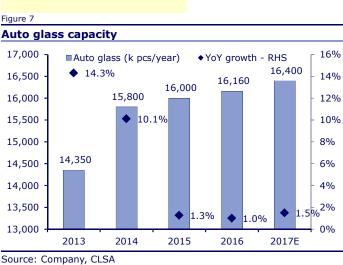

Glass industry is not yet on the top of the government's supply side reform agenda, probably due to the relatively larger no. of private companies in the industry but less SOEs, which also implies low market concentration. Supply has been mainly controlled by: 1) Pollution controls, e.g. some outdated capacity was asked to stop production in late 4Q16 in northern China; and, more importantly, 2) Industry discipline. Glass production lines have to run 24x7 once started operation, thus producers can only cut prices to reduce inventory when demand is not good. If demand/price is too weak to support profitability, producer will choose to shut down operation which takes at least 6-9 months to resume operation which is also very costly.

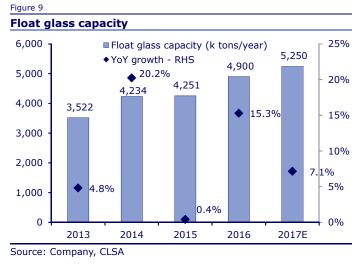

The surcharge proposal is not completely new to the materials industry, but we believe execution is the key, given the bulk of small private players in the industry. The incremental cost is roughly c.7-8% above current tariff, or <1%of overall glass production cost, thus we believe this will not face a lot of pushback from large producers but still could likely have some oppositions from small players. Although XYG's management disagrees with this surcharge plan, overall we believe this implies a relatively positive industry supply outlook for the whole industry, which is also supported by stricter pollution controls which may trigger occasional distortion to market supply.

Further expansions

Reiterate our view of a relatively balanced float glass demand/supply in 17CL Total Capex budget for 2017 is HK\$2.5bn (2016: HK\$1.85bn), mainly for Malaysia's expansion and investment property at Qianhai. In particular, the first phase project in Malaysia started operation in Jan-2017. With the expected good profitability, XYG will invest the second phase with two float glass lines (2,000t/d in total) expected to commence operation by 2Q18. Besides, XYG will also further improve operating efficiency of auto glass and construction glass facilities despite no/limited capacity growth, which will help support steady sales performance despite impact from Rmb depreciation.

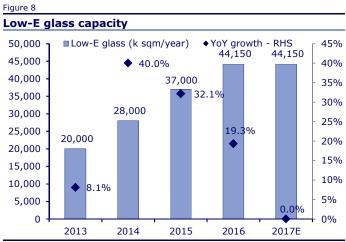

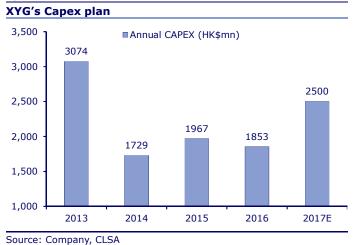

Figure 10

28 February 2017

Lifting forecasts

Reiterate BUY

We lift our 17/18CL core profit forecasts by 3.6%/4.5% mainly on higher float glass GPM and capacity, partly offset by lower profit contributions from Xinyi Solar (XYS). We also roll forward our valuation base year: For PE we use a target multiple of 9x on 18CL EPS (from 10x on avg 17-18CL); for PB we use a target multiple of 1.9x on 17CL BVPS (from avg 16-17CL). Our TP is thus unchanged at HK\$8.35. Retain BUY on undemanding valuation of 7.4x 17CL PE/6.6% 17CL dividend yield, with stable float glass demand/supply dynamics (e.g. less worry on property sector, supply limitation amid pollution controls) and any cost reductions (eg, natural gas, soda ash) as key catalysts.

Valuation details

We value XYG using a blended PE and PB approach. We apply a target multiple of 9x to 18CL EPS and a target multiple of 1.9x to 17CL BVPS, in line with the historical averages.

Investment risks

Key risks include: 1) Weakening of the property market or even the auto market. Demand for float glass and construction glass is highly dependent on the property market. Besides, despite being a stable business, the auto glass segment is correlated to the global number of vehicles in use, and any significant slowdown in the global auto industry may also affect the segment's performance. 2) Further tightening of credit. Tightening of credit also affects developers' cash flows and progress in construction of property projects. 3) Incremental production costs. A significant surge in natural gas, international crude oil prices and other raw material costs may affect XYG's gross margin if it cannot pass on incremental costs by raising ASP. 4) More capacity additions in the market.

Valuation details - Asahi Glass Co Ltd 5201 JP

We value the stock using a PE valuation methodology as the company's earnings trends has brightened as chemicals and flat glass earnings growth offsets LCD weakness. We forecast Asahi Glass to see revenue and operating profit growth in the medium term as the US and Eurozone economies improve and chemicals experience success with new products along with growth in Southeast Asia. Our target price of ¥1,025 is based on a PE of 18x, which is the three-year average, FY12/18CL estimates.

Investment risks - Asahi Glass Co Ltd 5201 JP

Fluctuating fuel costs are a risk because almost all of its businesses consume large amounts of fuel and materials. A US\$1 fall in oil prices adds ¥400mn to OP. An increase in oil prices would cause a decline in profits profits. We expect the LCD substrate market to continue to see price cuts, but if weakness in downstream markets put more pressure on prices they may decline more than our expectations. The company is expecting ¥30bn in non-operating costs, but we are assuming ¥20bn. If non-operating costs reach ¥30bn, net profits would drop which would affect our PB-ROE correlation derived PB multiple.

The policy of CLSA (which for the purpose of this disclosure includes subsidiaries of CLSA B.V. and CLSA

Americas, LLC ("CLSA Americas")), and CL Securities Taiwan Co., Ltd. ("CLST") is to only publish research that is impartial, independent, clear, fair, and not misleading. Analysts may not receive compensation from the companies they cover. Regulations or market practice of some jurisdictions/markets prescribe certain disclosures to be made for certain actual, potential or perceived conflicts of interests relating to a research report as below. This research disclosure should be read in conjunction with the research disclaimer as set out at www.clsa.com/disclaimer.html and the applicable regulation of the concerned market where the analyst is stationed and hence subject to. This research disclosure is for your information only and does not constitute any recommendation, representation or warranty. Absence of discloseable position should not be taken as а endorsement on the validity or quality of the research report or recommendation.

To maintain the independence and integrity of CLSA's research, our Corporate Finance, Sales Trading and Research business lines are distinct from one another. This means that CLSA's Research department is not part of and does not report to CLSA Corporate Finance (or "investment banking") department or CLSA's Sales and Trading business. Accordingly, neither the Corporate Finance nor the Sales and Trading department supervises or controls the activities of CLSA's research analysts. CLSA's research analysts report to the management of the Research department, who in turn report to CLSA's senior management.

CLSA has put in place a number of internal controls designed to manage conflicts of interest that may arise as a result of CLSA engaging in Corporate Finance, Sales and Trading and Research activities. Some examples of these controls include: the use of information barriers and other information controls designed to ensure that confidential information is only shared on a "need to know" basis and in compliance with CLSA's Chinese Wall policies and procedures; measures designed to ensure that interactions that may occur among CLSA's Research personnel, Corporate Finance and Sales and Trading personnel, CLSA's financial product issuers and CLSA's research analysts do not compromise the integrity and independence of CLSA's research.

Neither analysts nor their household members/associates/may have a financial interest in, or be an officer, director or advisory board member of companies covered by the analyst unless disclosed herein. In circumstances where an analyst has a preexisting holding in any securities under coverage, those holdings are grandfathered and the analyst is prohibited from trading such securities.

Unless specified otherwise, CLSA/CLSA Americas/CLST did not receive investment banking/noninvestment banking income from, and did not manage/co-manage a public offering for, the listed company during the past 12 months, and it does not expect to receive investment banking compensation from the listed company within the coming three months. Unless mentioned otherwise, CLSA/CLSA Americas/CLST does not own a material discloseable position, and does not make a market, in the securities.

As analyst(s) of this report, I/we hereby certify that the views expressed in this research report accurately reflect my/our own personal views about the securities and/or the issuers and that no part of my/our compensation was, is, or will be directly or indirectly related to the specific recommendation or views contained in this report or to any investment banking relationship with the subject company covered in this report (for the past one year) or otherwise any other relationship with such company which leads to receipt of fees from the company except in ordinary course of business of the company. The analyst/s also state/s and confirm/s that he/she/they has/have not been placed under any undue influence, intervention or pressure by any person/s in compiling this research report. In addition, the analysts included herein attest that they were not in possession of any material, nonpublic information regarding the subject company at the time of publication of the report. Save from the disclosure below (if any), the analyst(s) is/are not aware of any material conflict of interest.

Key to CLSA/CLSA Americas/CLST investment rankings: BUY: Total stock return (including dividends) expected to exceed 20%; O-PF: Total expected return below 20% but exceeding market return; U-PF: Total expected return positive but below market return; SELL: Total return expected to be negative. For relative performance, we benchmark the 12-month total forecast return (including dividends) for the stock against the 12month forecast return (including dividends) for the market on which the stock trades.

In the case of US stocks, the recommendation is relative to the expected return for the S&P500 of 10%. Exceptions may be made depending upon prevailing market conditions. We define as "Double Baggers" stocks we expect to yield 100% or more (including dividends) within three years at the time the stocks are introduced to our "Double Bagger" list. "High Conviction" Ideas are not necessarily stocks with the most upside/downside, but those where the Research Head/Strategist believes there is the highest likelihood of positive/negative returns. The list for each market is monitored weekly.

Overall rating distribution for CLSA/CLSA Americas only /CLST only Universe:
